

I just wanted to say thank you to all the staff and trainers that work here at California Career School. The professionalism, high standards, and friendliness that have been exhibited by all here made my stay and education a pleasant one. I would highly recommend anyone who wants a quality experience and education to get it here at California Career School. The training program is designed to allow any student who applies him or herself to obtain a commercial driver's license. Another reason for choosing California Career School is the assistance in obtaining employment after the schooling has been completed. This is invaluable, as I for one had no idea where to even begin to look for work after I had completed schooling. If had had to rate my experience at California Career School, I would give it a 10 out of 10 possible, or an A+. Again, thank you all for giving me a tremendous opportunity in an exciting field.
