PROFESSIONAL JUDGEMENT & FAFSA CORRECTIONS

Policy and Procedure

Policy

California Career School's policy is that all applicants attempt to make any necessary corrections to their FAFSA in order to provide a valid ISIR. A valid ISIR is required prior to beginning the award process for Federal Student Aid.

Procedure

An applicant may request that California Career School electronically recalculate the expected family contribution (EFC) because of a clerical or arithmetic error or the submission of inaccurate information. In this event prior to the Financial Aid Department initiating corrections to an applicant's FAFSA, the applicant will be required to initial each correction and sign the ISIR report that the correction is made on. This process will give California Career School permission to make the corrections on behalf of the applicant. No correction electronic or otherwise will be made to an applicant's FAFSA without following the above procedures.
